

SOFT-COATED WHEATEN TERRIER CLUB OF GB

OFFICIAL LIST OF PARENTS OF WHEATENS PROVEN TO HAVE RENAL DYSPLASIA

Whilst it is considered that Renal Dysplasia (RD) in the Soft-Coated Wheaten Terrier is inheritable, there is no clear agreement on the mode of inheritance. It must be remembered that there are other causes of kidney disease other than genetic inheritance.

List A/1 – Matings which have produced one or more offspring affected by RD

(Each case on this list has been confirmed by post-mortem)

Year of Death	Sires	Litter Born	Dams
2013	Keridown In City Dreams	18/6/2011	Standoric Returns With Zola
	Ch. Feanaro Niallan Naomhan	14/6/2011	Ellora Funki Valli
1993	Valken Cobnut	15/4/1993	Valken Magic Moment
	Ch. Glendowan Garfield	22/10/1984	Plumhollow Brigh Solitaire
1988	Maddalo Flashy Boy	1/9/1983	Maddalo Christmas Celebrations
1983	Bacanti Bardolino	10/10/1983	Glynby Christmas Cracker
	Linksdale Peakaboo	18/2/1983	Plumhollow Kiss Me Kate
	Glendowan Gasper	29/07/1982	Seymour Of Kennedyside
1988	Ch. Clonhill Caesar	8/8/1982	Maddalo So Graceful
1984	Bacanti Bierritz	12/9/1981	Maddalo Christmas Celebrations
1981	Ch. Piperslanding Oh Johnny	4/10/1981	Ch. Glendowan Clarinda
	Maddalo Jubilee Golden Boy	12/1/1979	Manyara Kardine
1976	Clarkfield Casper	5/3/1976	Fifehead Black Bess
		11/11/1977	
		14/8/1978	
1978	Finchwood Mr McHenry	23/6/1974	Laureats Goldilocks

List A/2 – Matings which have produced one or more offspring clinically deduced to have died from RD by a veterinary expert: i.e. dogs under specialist treatment for RD where post-mortems were inconclusive (due to excessive scarring of kidney tissues)* or post-mortem conclusive but no other related cases+ so not necessarily 'familial' (inherited).

Year of Death	Sires	Litter Born	Dams
1999	+Ch. Shar-D's New Beginning At Eridanus	28/1/1999	Fantasa Atomic Blonde
1986	*Finchwood Meadow Rue	16/12/1982	Bacanti Bright Eyes

List B - Matings which have produced one or more offspring clinically deduced to have died from RD and diagnosis agreed from the dog's veterinary case notes by our two Veterinary experts.

Year of Death	Sires	Litter Born	Dams
2020	Jaeva Storm Trooper	9/6/2017	Jaeva Queen Of The Night

Renal Dysplasia (RD) has been recognised as a cause of kidney failure & death in young Wheatens since the mid-1970s. It was well characterised by Professor Andrew Nash and colleagues in 1984. There is a familial and inherited basis to this condition, although the mode of inheritance has not been confirmed it is suspected to be autosomal recessive. Currently, there is no genetic test for this condition.

N.B. A Club booklet explaining Renal Dysplasia is available from The Club Secretary.
